Mid-America Vascular Study Group

Tuesday, April 26, 2022
1:00 PM – 4:00 PM CT
Northwestern Memorial Hospital-Arkes Pavilion
Chicago, IL
Hybrid
Meeting Attendance Credit

Before we get started, please sign in.

1. Click “Participants” in the box at the top or bottom of your screen.
2. If your full name is not listed, hover next to your name and you’ll see “rename”.
3. Click and sign in.

If you can’t sign in, please email Leka Johnson at ljohnson@svspso.org and let her know the identifier you were signed in under (ex –LM7832 or your phone number).

**SPECIAL NOTE: We do give credit to residents/fellows that don’t have a PATHWAYS user account !!!

Sign in with your Full name, MD, Name of Institution

| 1:25   | Regional Data Review-Ashley Vavra, MD, Regional Medical Leader Learning Objectives:  
- Use the VQI regional reports to establish quality improvement goals for the vascular patients (outcomes) and for their center (process).  
- Interpret and compare each centers’ VQI results to regional and national benchmarked data.  
- Learn, through group discussion the VQI regional results to improve the quality of vascular health care by monitoring measurable performance indicators, SVS PSO evidence-based research, and outcomes.  
- Identify high performing regional vascular centers to discuss variations in care and clinical practice patterns to improve outcomes and prompt quality improvement recommendations for vascular care patients. Sharing of best practices/pathways of care. | Yes       |

Introduction

Tracy Campin, RN
Vascular Surgery Clinical Program Coordinator
Nebraska Medicine
Regional Medical Director Introduction

Ashley Vavra, MD, MS
ashley.vavra@nm.org
Goals

- Support meaningful change to ensure delivery of high quality, high value care.

- Biannual meetings:
  - Celebrate wins, identify opportunities for improvement
  - Review and introduce available resources for QI
  - Exchange best practices and models for positive change

- Crow and Confess
- Solicit feedback for content/format of our meetings
Spring Regional Reports

Ashley Vavra, MD

VQI Regional Quality Report

Spring 2022

This report is patient safety work product generated within the SVS PSO, LLC, and is considered privileged and confidential.

About the Report

The VQI Regional Quality Report is produced semiannually to provide centers and regions targeted, comparative results and benchmarks for a variety of procedures, process measures, and postoperative outcomes. The report is organized into separate reports that can be quickly accessed by clicking on the report names in the table of contents on the left.

For drill-down and data feedback on your center’s cases, click on “VQI Case Appendix” in the table of contents on the left.
Spring 2022 Important Report Updates:

Report-Specific Updates

The following report-specific updates have been implemented to enhance and improve the specified report(s):

• **TFEM CAS**
  – Changed inclusion/exclusion criteria – Procedures with an approach of either Brachial or Radial are now included in both ASYMP and SYMP reports.

• **EVAR: SVS Sac Size Guideline**
  – Nomenclature change to “EVAR: SVS AAA Diameter Guideline”. No changes to the report itself.
Data: Birds Eye View
Physician Specialties in VQI

VQI N=5,849

Top 3 specialties
- Vascular Surgery
- Cardiology
- Radiology

Region N=438
### Region Volume Appendix

The region must have ≥3 centers with included cases for comparison to VQI overall.

TFEM CAS ASYMP: Stroke/Death

Procedures performed between January 1 and December 31, 2021
Includes Transfemoral Carotid Artery Stenting (TFEM CAS) procedures performed on asymptomatic patients. Asymptomatic patients are patients with no ipsilateral or contralateral retinal or cortical TIA or stroke within 180 days prior to surgery. Includes procedures utilizing a femoral, brachial, or radial approach. Excludes any patient with prior vertebrobasilar TIA or stroke, prior ipsilateral CAS, CAS for intracranial treatment, or any procedure involving dissection, trauma, FMD, or “Other” lesion types. Procedures with an approach other than femoral, brachial, or radial are also excluded.

The table below gives the number of TFEM CAS procedures (performed on asymptomatic patients) meeting the inclusion criteria, and the observed and expected rates of in-hospital stroke or death for those cases.

<table>
<thead>
<tr>

Regions (regions with <3 centers with at least 10 complete cases not shown)

Rates shown are among complete cases. "***" indicates region's observed rate differs significantly from its expected rate
TFEM CAS SYMP: Stroke/Death

Procedures performed between January 1 and December 31, 2021

Includes Transfemoral Carotid Artery Stenting (TFEM CAS) procedures performed on symptomatic patients. Symptomatic patients are patients with an ipsilateral or contralateral retinal or cortical TIA or stroke within 180 days prior to surgery. Includes procedures utilizing a femoral, brachial, or radial approach. Excludes any patient with prior vertebrobasilar TIA or stroke, prior ipsilateral CAS, CAS for intracranial treatment, or any procedure involving dissection, trauma, FMD, or “Other” lesion types. Procedures with an approach other than femoral, brachial, or radial are also excluded.

*Expected rate* is the rate estimated by a statistical model that accounts for patient characteristics, including age, gender, race, BMI, comorbidities, medication and stroke and vascular history. “Cases with complete data” include patients who have data on all of those factors.
Stroke or Death after TFEM CAS for Symptomatic Patients by Year

Rates shown are observed rates among cases meeting inclusion criteria.
TCAR ASYMP: Stroke/Death

Procedures performed between January 1 and December 31, 2021

Includes TransCarotid Artery Revascularization (TCAR) procedures performed on asymptomatic patients. Asymptomatic patients are patients with no ipsilateral or contralateral retinal or cortical TIA or stroke within 180 days prior to surgery. Excludes any patient with prior vertebrobasilar TIA or stroke, prior ipsilateral CAS, CAS for intracranial treatment, or any procedure involving dissection, trauma, FMD, or “Other” lesion types. Procedures with an approach other than carotid percutaneous or carotid open are also excluded.

The table below gives the number of TCAR procedures (performed on asymptomatic patients) meeting the inclusion criteria, and the observed and expected rates of in-hospital stroke or death for those cases.

PSO Survey on LTFU

Difficulties Collecting LTFU

- Lack of dedicated staff for LTFU data collection: 46
- Staff reassigned due to COVID: 16
- Follow up occurs at an office outside of your facility: 83
- Follow up occurs outside of LTFU window (9-21 months): 74
- Lack of scheduling resources: 43
- Lack of access to medical records: 37
- Other: 37
### EVAR: Sac Diameter Reporting

Procedures performed between January 1 and December 31, 2019

Includes Endovascular AAA Repair (EVAR) procedures. Excludes patients who were converted to open or died within 21 months of surgery.

The table below gives the number of EVAR procedures meeting the inclusion criteria, and the percentage of those procedures where a sac diameter was reported between 9 and 21 months post-procedure.

TEVAR: Sac Diameter Reporting

Procedures performed between January 1 and December 31, 2019

Includes Thoracic Endovascular Aortic Repair (TEVAR) procedures for aneurysm or aneurysm from dissection. Excludes procedures where no aortic device was implanted or patients who were converted to open or died within 21 months of surgery.

The table below gives the number of TEVAR procedures meeting the inclusion criteria, and the percentage of those procedures where a sac diameter was reported between 9 and 21 months post-procedure.

INFRA CLTI: Major Complications

Procedures performed between January 1 and December 31, 2021

Includes Infrainguinal Bypass (INFRA) procedures for rest pain, tissue loss, or acute ischemia. Major complications are defined as in-hospital death, ipsilateral BK or AK amputation, or graft occlusion.

The table below gives the number of INFRA procedures meeting the inclusion criteria, and the percentage of those procedures that resulted in in-hospital death, ipsilateral BK or AK amputation, or graft occlusion.

Summary

• Overall performance is comparable or better than benchmark
  – Carotid Disease
  – Aneurysmal Disease

• Opportunities
  – Reporting: LTFU and Sac Size
  – Infrainguinal bypass
How can we help?

• Feedback?
  – ashley.vavra@nm.org
  – tcampin@nebraskamed.com

• Solicitation for:
  – Content (PSO, research, QI)
  – Resources
  – Interest in QI collaboration
National VQI Update

Caroline Morgan, BSN
PSO Clinical Associate
What is a PSO

PSO = Patient Safety Organization

- Created under authorization of the Patient Safety and Quality Improvement Act of 2005 (PSQIA)
- Goal – Improve quality & safety of health care delivery
- PSQIA encourages voluntary reporting & sharing of patient safety information without fear of legal discovery
Functions of a PSO

- Protects comparative data from discovery
- Eliminates need for informed patient consent & IRB approval for core registry participation
- Allows patient identifiers to be included for internal purposes
- Only de-identified data can be released
  - Benchmarking, risk adjustment and merging with other identified data sets done within the PSO
  - QI research requires approval of PSO RAC committee; analytic data sets are de-identified
PSO Activities

• Patient Safety Work Product (PSWP) - Reports that identify center-specific or physician-specific outcomes or processes
  – Semi-annual reports
  – Quarterly Dashboards
  – COPI/CAPI reports

• All reports treated as confidential

• Utilization of PSWP
  – Encourages a culture of safety
  – Provides a mechanism for feedback
  – Non-identifiable
  – Never used for punitive or competitive purposes
Center Requirements

Patient Safety Evaluation System (PSES)

• Designation of user account privileges
• PSWP analysis is recommended to be outside of normal QA/Peer Review meetings
• Develop process on how to integrate PSWP results into the overall QI operations
• PSES requires training for those with access to PSWP to ensure that the privilege & confidentiality of PSWP is maintained
• The law provides significant penalties for failure to maintain the confidentiality of PSWP.
Number of Participating Centers

Location of VQI Participating Centers

912 VQI Centers
911 centers in North America
1 center in Singapore

VQI Total Procedure Volume

Total Procedure Volume reflects net procedures added to the registry for the month.
18 Regional Quality Groups
2022 VQI Annual Meeting at VAM

Dates:
- Tuesday afternoon, June 14, 2022, 12PM – 6:30PM ET
- Wednesday, June 15, 2022, 8AM – 5PM ET

Location:
- Hynes Convention Center, Boston, MA

*Poster Presentation and Networking Reception
  Tuesday, June 14, 2022
  5:00PM to 6:30PM

*Quality Improvement Session
  Saturday, June 18, 2022
  1:30PM to 2:30PM

Hope to see you there!!!
Long Term Follow Up Reports

Currently available:

- EVAR, CAS, CEA

- Soon to be released PVI, TEVAR, IVC, HDA......
Device Assist and Symmetric Integration

- **Device Assist** – New device search functionality within Pathways to assist in finding the devices used for treatment
  - Search by manufacturer, device name
  - Available in the PVI Registry Comprehensive data collection tool

- **Symmetric** – Healthcare supply software company
  - Reducing/eliminating data discrepancies
  - Providing real-time up to date access to FDA approved devices
Pilot Extension

My PAD
My Peripheral Arterial Disease Pilot

• Quality of Life survey for the PVI Registry
• Extending pilot to new interested centers
• Start up education and promotional documents will be provided
• For questions or interest please contact cmorgan@svspso.org
Regional Lead Data Managers

- Volunteer position
- Help to organize/coordinate Regional Meetings
- Disseminate information gathered from RLDM quarterly meetings with the SVS PSO staff to your region’s Data Managers
- Strategies for recruitment & filling vacant positions
Grants & Industry Meeting Support

• Not guaranteed funds
• On average industry supporters provided $1,000 - $2,000 for regional meetings
• New reporting standards have changed food and beverage support for regional meetings
• Be prepared to cover these type costs with other funding
Website Redesign

• A new VQI.org experience is coming!
• New look and feel, fresh content, and improved navigation.
• Our goal is to showcase the new site at VQI@VAM
The SVS Vascular Quality Initiative (VQI) is now on LinkedIn. Follow our page for the latest news and events!

The mission of the VQI is to improve the quality, safety, effectiveness and cost of vascular healthcare by collecting and exchanging information.

SVS Vascular Quality Initiative (VQI)®
Improving vascular care.
• The SVS PSO is pursuing the creation of a brand new VQI Mobile App that could be used on your personal device.

• We hope this will allow us to get information to you more effectively and efficiently.

• The VQI Mobile App will start out as a communication tool, and hopefully grow from there.
Nov 2, 2021 – Day #1
- Benefit-risk profile of the Endologix AFX endovascular graft system with regards to the risk of Type III endoleaks

Nov 3, 2021 – Day #2
- Real World Surveillance of AAA Endovascular Stent Grafts
Conclusions:
Endologix AFX has history of increased Type III endoleaks –
• Panel expressed concerns about role of AFX 2
• Mitigation efforts taken
• Further steps underway with FDA, industry and VQI

Real World Evidence plays an important role in analyzing EVAR
• Follow up 5-10 years
• Needs support
• Clinical Registry – VQI
• Vascular Research Collaborative (VRC)
• VISION - CMS claims linkage
VQI analysis of Paclitaxel controversy

DELTA
Data Extraction and Longitudinal Trend Analysis 2020-2024
Registry surveillance
Fred Resnic, MD
Lahey Hospital & Medical Center

VISION
Vascular Implant Surveillance and Interventional Outcomes Network
VQI-CMS claims matched analysis
Phil Goodney, MD
Art Sedrakyan, MD

MDEpiNet Medical Device Epidemiology Network
Conclusions:

• Prospective, active surveillance of the SVS VQI PVI registry using DELTA did not demonstrate a signal for increased mortality.

• Claims analysis through VISION did not demonstrate a signal for increased mortality or major amputation.

• VQI data did not show increased mortality with Paclitaxel devices.
Regional Meeting CME/CE Credit

Des Moines University is the continuing education provider for this activity.

The attendance roster will be cross-referenced with those applying for CME/CE. Sign in correctly.

Each participant **MUST COMPLETE BOTH** the attendance attestation and the meeting evaluation from the URL site — one form.

You will have 7 days from the date of the meeting to complete the forms and **SUBMIT**.

Approximately 14 days from the meeting, Des Moines University will email you instructions on how to access your certificate.

PSO leadership is providing continuing education credit to you at no charge!

If you do not complete and submit the online forms within 7 days, continuing education credit cannot be awarded.
REMEMBER TO PSO:

• **P**UT your FULL NAME in RingCentral to get credit for attendance and CME/CE credit (no exceptions will be made)

• **S**END an email to ljohnson@svspso.org with names of group members that are sharing 1 device

• **O**FFICIALLY apply for CME/CE credit by clicking this link: https://dmu.co1.qualtrics.com/jfe/form/SV_eDsGHLsymGfc0dM

You only have **7 days** to complete forms for CME/CE Credit.

NO EMAIL WILL BE SENT AS A REMINDER OR WITH THE CME/CE LINK
Quality Improvement Update
Spring 2022

Caroline Morgan, BSN
PSO Clinical Associate
Regional Improvement Projects

Current Quality Improvement Charters

- SVS Guidelines rAAA
  - Tracy Campin – Nebraska Medicine
Trainee Program Update

- Mentor based 12–18-month program
- Regional meetings, center data review
- Quality and research opportunities
- VQI@VAM
- Chance to be selected for scholarship
- Quarterly check-ins with SVS PSO staff
- Satisfaction surveys, feedback
- GLemmon@svspso.org or bwymmer@svspso.org

2022 PARTICIPATION AWARDS PROGRAM

The four domains for the 2022 Participation Awards criteria:

Domain 1 – LTFU – 40% weighted
Domain 2 – Regional Meeting Attendance – 30% weighted
Domain 3 – QI Project – 20% weighted
Domain 4 – Registry Subscriptions – 10% weighted

The final score is calculated as follows:

Total points = 4 x LTFU score + 3 x Attendance score + 2 x QI score + 1 x registry score
Participation Awards

Domain – QI Project – 20% weighted

Scoring on 0 – 6-point scale to keep consistent with other measures. This gives centers options for getting **6 maximum QI points.**

- Initiation of a QI Project, evidenced by submitting a Project Charter to QI@SVSPSO.ORG or bwymer@svpspo.org (2 points). **One charter per year.**

- Presenting a QI Project (presentation or poster) at a Regional VQI, *Regional Society Meeting,* or *Hospital Board* meeting (2 points) *When presenting at succinct regional meetings, project slides must reflect a change or update in status.*

- Presenting a QI Project (presentation or poster) at the National VQI or *Vascular Annual Meeting* (2 points)

- *Publish a VQI quality improvement* article in a Peer Reviewed Journal (2 points)

- Centers with significant improvement or excellent performance rates on National QI Initiatives will receive one additional point (per initiative), for a maximum of 6 QI points

* Please send attestation (proof) to bwymer@svpspo.org on or before December 31, 2022.
Participation Award Results

  – 1:1 Meeting
    • bwymer@svspso.org
Quality Improvement Updates

• Charter Focus Calls
  – New format
• Quarterly Webinars
• Monthly VQI Newsletter
• Sample Charters
• Overview of QI Tools
• https://www.vqi.org/quality-improvement/
Arterial Quality Council:
Trissa Babrowski, MD
• Discussion for development of new National Quality Initiatives
  – Discharge Mediation measure placed in maintenance mode due to high compliance
  – EVAR Sac Diameter – need for continued efforts to improve compliance

• National LTFU Survey creation & results

• VQI Risk Calculators

• Harmonization of Urgency variables as much as possible across “like” registries
Venous Quality Council:
Ravi Hasanadka, MD
SVS created a separate Venous RAC

The Vascular Quality Initiative - National Venous RAC Schedule (vqi.org)

2021: 3 proposals
• Incidence of venous thromboembolic events (VTE) after endovenous ablation in patients with venous stasis ulcers (C6 disease): Jaime Benarroch-Gampel
• Impact of Treatment Length and Treatment Region on Clinical Outcomes after Varicose Vein Procedures: Halbert Bai
• Safety and efficacy of endovenous ablation in patients with a history of DVT: Mikel Sadek

• AVF meeting
  February 23rd - 26th, 2022

Ideas for Venous Registry Specific Metrics:
  – Anticoagulation after venous stents?
  – C2 disease for varicose veins?
  – IVC temporary filter retrieval?
  – IDEAS???
Arterial Research Advisory Council:
Kamal Gupta, MD
RAC abstract submissions

• Continue to have robust number of submissions nationally
• 30-60 each cycle
• New Abstract review process to help with timely and better reviews
  – Each abstract will be assigned a primary and a secondary reviewer
  – Each primary reviewer will get 10-20 abstracts
Dr. Leila Mureebe,
SVS PSO Associate Medical Director

– Creating videos on how to submit a RAC Proposal for “success”
– Creating useful tools and tips to train new investigators
1. Management and treatment outcomes of patients undergoing endovenous ablation are significantly different between Intersocietal Accreditation Commission-accredited and nonaccredited vein centers
Andrea T Obi, Sophia Afridi, Fedor Lurie DOI: 10.1016/j.jvsv.2020.07.007

2. Transcarotid artery revascularization versus carotid endarterectomy and transfemoral stenting in octogenarians
Ambar Mehta, Priya B Patel, Danielle Bajakian, Richard Schutzer, Nicholas Morrissey, Mahmoud Malas, Marc Schermerhorn, Virendra I Patel DOI: 10.1016/j.jvs.2021.05.028

3. Percutaneous brachial access associated with increased incidence of complications compared with open exposure for peripheral vascular interventions in a contemporary series
Charles DeCarlo, Christopher A Latz, Laura T Boitano, Anna A Pendleton, Jahan Mohebali, Mark F Conrad, Matthew J Eagleton, Samuel I Schwartz DOI: 10.1016/j.jvs.2020.08.143

4. A comparison of administrative data and quality improvement registries for abdominal aortic aneurysm repair
Kirsten D Dansey, Livia E V M de Guerre, Nicholas J Swerdlow, Chun Li, Jinny Lu, Priya B Patel, Salvatore T Scali, Kristina A Giles, Marc L Schermerhorn DOI: 10.1016/j.jvs.2020.06.105

5. Perioperative Outcomes for Centers Routinely Admitting Postoperative Endovascular Aortic Aneurysm Repair to the ICU
Thomas W Cheng, Alik Farber, Scott R Levin, Mahmoud B Malas, Karan Garg, Virendra I Patel, Ahmed Kayssi, Denis Rybin, Rebecca B Hasley Jeffrey J Siracuse DOI: 10.1016/j.jamcollsurg.2021.03.035
DOI: 10.1053/j.semvascsurg.2021.04.001

7. Lower Extremity Revascularization for Chronic Limb-Threatening Ischemia among Patients at the Extremes of Age  Tanner I Kim, Edouard Aboian, Uwe Fischer, Yawei Zhang, Raul J Guzman, Cassius Iyad Ochoa Chaar  
DOI: 10.1016/j.avsg.2020.08.135

8. Stress testing before abdominal aortic aneurysm repair does not lead to a reduction in perioperative cardiac events  Jesse A Columbo, Falen Demsas, Zachary J Wanken, Bjoern D Suckow, Jocelyn M Beach, Stanislav Henkin, Philip P Goodney, David H Stone  
DOI: 10.1016/j.jvs.2021.02.032

DOI: 10.1016/j.jvs.2020.08.147

10. Endovascular interventions for claudication do not meet minimum standards for the Society for Vascular Surgery efficacy guidelines  Jonathan Bath, Peter F Lawrence, Dan Neal, Yuanyuan Zhao, Jamie B Smith, Adam W Beck, Michael Conte, Marc Schermerhorn, Karen Woo  
DOI: 10.1016/j.jvs.2020.10.067
• Ensure your RAC submission is complete
  – Data Tables
  – Full Research proposal
  – CV
  – Regional RAC Review

• Your center must participate in the registry related to your research proposal
1. Review list of projects: https://www.vqi.org/data-analysis/rac-approved-project-search/

2. Submit proposal online: http://abstracts123.com/svs1/meetinglogin

3. Deadlines for submissions: The Vascular Quality Initiative | National Arterial and Venous RAC Schedules (vqi.org)
Governing Council:
Ashley Vavra, MD
Dr. Lemmon provided an updated on the VQI Fellows in Training program

The Governing Council provided input on the PSO 2022/2023 software development activities

Dr. Jorgensen provided an update on the FDA panel discussions regarding type 3 endoleaks

Kristopher Huffman presented the PSO’s strategy around the development and maintenance of Risk Calculators
Regional Nominations

• Regional Associate Medical Director

• Venous RAC Chair
  – Nominations for both positions were sent out March 2022
  – Received no nominations for either position
  – Reopen nominations for these open positions?
PSO and FIVOS logistics
Site Profile

- Please routinely review your Center Characteristics for accuracy.
- For those who have left your facility, please change their status to inactive and maintain current email addresses.
Updates for Spring 2022
VQI Regional Meeting
PATHWAYS Support

Claims Validation

The annual claims validation process is intended to ensure that all eligible cases have been captured in the registry and is a requirement of participation in the VQI.

The 2020 Claims Validation process was launched in September 2021.

- The deadline to finish was 12/31/21.
- PATHWAYS Support is here to help you. Please reach out if your center was selected to participate in the audit and would like assistance.

The selection and launch of 2021 Claims Validation is coming soon! Stay tuned!
What’s New?
Please check out recent enhancements in the PATHWAYS Support tab designed to improve your experience. Let us know what you think!

● **Documents** – Easy access to important abstraction documents.
  ● **Code List** – Complete list of current VQI Eligible ICD-10 and CPT codes.
  ● **Data Dictionary** – Ability to download data variables by procedure or all procedures.
  ● **Inclusion/Exclusion Criteria** – Defines the procedures that are eligible for Inclusion/Exclusion in the registry.
  ● **Paper Form** – Paper form for data abstraction.

● **Release Notes** - Access details on historical registry updates and other important announcements.

● **Training Schedule** – List of upcoming training opportunities and registration links for new staff and experienced abstractors.
PATHWAYS Support

Coming Soon...

The Support Team continues to work on implementing enhanced tools and training opportunities for new and existing PATHWAYS users to learn more about PATHWAYS functionality.

More details to come!
Technology Updates for VQI
Released in Q3 2021

- CAS Follow-up Outcomes Report

A new 'Follow-up Outcomes Report' for the CAS registry, developed by the SVS PSO, is now available in the PATHWAYS Reporting tab. The report will provide key follow up metrics for VQI sites with center data as well as regional and all VQI benchmarking and includes drill down capabilities to better understand center data at the procedure level.
Released in Q3 2021

- Infra Opioid Pilot
  - Infra-inguinal Bypass registry was updated to include new Opioid fields for all participating sites. The fields appear on their own tab at the end of the procedure and follow-up forms.
  - Procedure variables were added to the Procedure form in a tab called “Opioid”. The tab contains both Demographics and Post-Op variables.
  - Follow-up variables are in the 30-day follow-up and long-term follow-up forms for Infra-inguinal Bypass procedures.
  - Discharge and follow-up opioid detail columns display dynamically depending on type(s) of opioids selected.
Released in Q3 2021

- Infra Opioid Pilot, cont.
  - Follow-up medications also include reference columns so the user can see the number of pills/patches and refills originally prescribed at discharge. These reference columns automatically populate based on data entered in the procedure form, or display N/A if there is no discharge information available.
  - For discharge and follow-up opioids, the Morphine Equivalent (MME) column is automatically calculated using medication-specific factors. MME is calculated as Dose x Frequency x Conversion Factor. We will not calculate the MME value if the medication type is Other, and/or if the frequency is PRN. Please note that for Methadone the conversion factor increases at higher doses and for Fentanyl it is dosed in mcg/hr instead of mg/day.
Released in Q3 2021

• TEVAR revisions - New dependency for LTFU Entry Flow and Dissection Date and Type
  • TEVAR LTFU Entry Flow:
    • A change was made to the dependency for Entry Flow on the TEVAR follow-up form. The field ‘Entry Flow’ no longer displays when imaging is equal to ‘None’.
  • TEVAR Dissection Date and Type:
    • There was formerly no validation between Dissection Onset Date and Procedure Date, or between Dissection Onset Date and Dissection Type. As such, it was possible to enter a Dissection Date that is after Procedure Date, as well as record a Dissection Date that does not match the selected type (Acute or Chronic). Validation was added so if this mismatch occurs, users must correct either the ‘Dissection Date’ or the ‘Dissection Type’ before being allowed to submit the procedure form.
Released in Q3 2021

• CEA revisions
  • New fields associated with imaging were added.
  • New dependencies were added to the Modified Rankin Score fields so they will display on the form only when the patient had a stroke.
  • The layout of the Pre-op Imaging section was changed slightly in order to harmonize the format with other registries where Right and Left sides are displayed separately in two columns.
  • The Stenosis fields being retired were mapped to new fields.
Released in Q3 2021

- CAS revisions
  - New event fields and fields associated with imaging were added in order to collect more granular information.
  - Modified fields - Lesion Stenosis L1 and L2 have updated min/max ranges from 0-99 to 0-100.
  - The Other Imaging Stenosis fields were retired and replaced with fields that are specific to each imaging type.
Released in Q3 2021

• VMC revisions
  • New fields were added to the VMC registry to capture Peak Systolic Velocity and End Diastolic Velocity Stenosis Events in the Procedure and Long-Term Follow-up.
  • The response options for the Carotid Stenosis Right and Carotid Stenosis Left in both the Procedure and the Follow-up forms were revised.
  • The Carotid PSV Right and Carotid PSV Left data collection fields were retired. The layout of the Carotid Disease section of the Procedure Form will be changed slightly in order to harmonize the format with other registries where Right and Left sides are displayed separately in two columns.
Released in Q3 2021

- IVC Filter revisions
  - The registry consolidated the “Other” IVC filter device options into a single option for both retrievable and permanent devices. All of the “Other” temporary and retrievable devices (select options 20 through 39 in the IVC_FILTER_TYPE field) were retired and a new 99 = Other field was created which will open the existing Other field (IVC_FILTER_TYPE_OTHER).
Released in Q3 2021

- Add comment to completed record
  - Users are now able to append additional comments without making changes to original data in the form. The Comments field now includes a new button labelled “Update Comments” that initially appears as grayed out. If users change or add any information in the Comments field, the button becomes active and allows the user to save the changes without reverting the form.

Released in Q3 2021
Released in Q3 2021

- Auto-save before timeout
  - Formerly, if users were logged out of PATHWAYS due to inactivity, any data entry changes they have made were lost. This feature will automatically save changes to records and will flag the record accordingly in the record information table.
Released in Q4 2021

- EVAR and TEVAR revisions: Convert "Aptus HeliFX" device name to "HeliFX"
  - The manufacturer name was removed from the response options for the “Anchors Type” field. Therefore the “Aptus Heli-FX” device name was converted to “Heli-FX”. This change affected both the procedure and long-term follow-up (LTFU) forms.
Released in Q4 2021

- EVAR Follow-up Outcomes Report
  - The existing EVAR Follow-up Outcomes report was moved from Insights to the Reporting tab in PATHWAYS. As a result, the Report Privileges in the User Information page under the Admin tab replaced the current Insights section.
  - The report was updated to include Kaplan Meier rates of occurrence for Stroke, Myocardial Infarction, Mortality, and Re-intervention at 1 year.
  - At the time of release, all users who currently had access to the Insights version of the report will automatically have the permission enabled for the updated version.
Released in Q4 2021

- Custom Lists
  - A new “Custom Lists” button was added to the Admin tab in PATHWAYS. The existing “Assistant Setup” and “Hemodialysis Access Late Follow-up Contact” icons under the Admin tab were transitioned to the “Custom Lists” functionality. Custom Lists will allow users to create Assistants, Trainees and Hemodialysis Access late Follow-Up Contacts.
Released in Q4 2021

• Infra Opioid Updates
  • Antidepressant option was removed from the Non-Opioid Pain Med Use variables.
  • The Number of Pills Prescribed fields was modified to accept 3 digits instead of 2.
  • The “Number of Refills Since Procedure” labels was changed to “Number of New Prescriptions Since Procedure.”
  • The Dose, frequency, number of pills/patches, and number of new prescriptions fields will be optional in the 30-day follow-up form.
  • The Dose, frequency, number of pills/patches, and number of new prescriptions fields will remain required on the Long-Term Follow-up (LTFU) but will not be mandatory for follow-up credit.
  • The LTFU Completion Rate will be recalculated. LTFU records submitted before the release that meet the updated mandatory field requirements will be flagged as valid and included in the calculation for successful follow-up.
Released in Q4 2021

- VQI Across Registry Revisions - Gender to Sex
  - The label for the “Gender” data collection field will be changed across all VQI registries to “Birth Sex” and a new response option, “Other”, will be added. The help text will be updated to reflect this change:
Released in Q4 2021

• New COVID Vaccination fields
  • Four new data collection fields will be added under the Procedure tab in PATHWAYS to collect information about COVID-19 vaccines
Released in Q4 2021

- New Trainee and Other Assistant fields
  - PATHWAYS Admin section of PATHWAYS was updated to introduce new Trainee fields to the VQI registries. This release allows trainee and other assistant information and retires the Assistant field previously used to collect similar information.

![Trainee and Other Assistant fields interface](image-url)
Released in Q4 2021

• EVAR/TEVAR revisions
  • **EVAR**
    • The min/max range for Largest Sheath Size Right and Largest Sheath Size Left will be changed from 7-24 to 6-24.
    • The help text will be updated to reflect the change in the min/max range, and the existing EVAR Devices graph will be removed.
  • **TEVAR**
    • The min/max range for Largest Sheath Size Right and Largest Sheath Size Left will be changed from 16-30 to 6-30.
    • The help text will be updated to reflect the change in the min/max range, and the existing TEVAR Devices graph will be removed.
Released in Q4 2021

- CEA Follow-up Outcomes Report
  - A new 'Follow-up Outcomes Report' for the CEA registry, developed by the SVS PSO, is now available in the PATHWAYS Reporting tab. The report will provide key follow up metrics for VQI sites with center data as well as regional and all VQI benchmarking and includes drill down capabilities to better understand center data at the procedure level.
Registry Projects
SVS Post-Market Surveillance Projects

- These projects are conducted within the SVS PSO and only non-identifiable data (removal of patient, center and physician information) will be provided to Medtronic/BARD/Cook/Gore or the FDA. Only standard of care practice is being evaluated. For such PSO activities, patient informed consent and Institutional Review Board review are not required.

- Sites must follow their institutional guidelines.
TEVAR Dissection Surveillance Project

• The SVS PSO is excited to announce the continuation of the TEVAR Dissection Surveillance Project to evaluate the Cook Zenith Dissection Endovascular System. FDA approval was granted for this device after safety and effectiveness were demonstrated in pre-market studies of complicated dissection with the proviso that the efficacy of TEVAR treatment of descending aortic dissection would be more fully analyzed through post-market surveillance, as was done through VQI for the W. L. Gore and Medtronic devices after their approval.
• Patients will have 30 day, and annual visits for 5 years.
• Total reimbursement of $4,000 per patient for a patient followed annually for 5 years
TEVAR Dissection Surveillance Project

- 73 of the 180 required patients enrolled (39 potential cases in process)
- Retrospective enrollment allowed- All eligible cases from December 31, 2018 (protocol FDA approval date)
- 34 30-Day visits completed, 18 1-year follow-up visits completed and 1 2-year follow-up visit completed
- All 40 sites enrolled (5 are in contracting)
- This project is conducted within the SVS PSO and only non-identifiable data (removal of patient, center and physician information) will be provided to Cook or the FDA. Only standard of care practice is being evaluated. For such PSO activities, patient informed consent and Institutional Review Board review are not required.
Initiated in October 2014, the TEVAR Dissection Surveillance Project Arm evaluates the W.L. Gore and Medtronic devices for treatment of Type B thoracic dissections.

Meeting FDA requirement

- 194 chronic and 200 acute patients with device technical success

Currently in 5-year follow-up phase
REMEMBER TO PSO:

- **P**ut your FULL NAME in RingCentral to get credit for attendance and CME/CE credit (no exceptions will be made)

- **S**end an email to ljohnson@svspso.org with names of group members that are sharing 1 device

- **O**fficially apply for CME/CE credit by clicking this link: https://dmu.co1.qualtrics.com/jfe/form/SV_eDsGHLSymGfc0dM

You only have **7 days** to complete forms for CME/CE Credit.

NO EMAIL WILL BE SENT AS A REMINDER OR WITH THE CME/CE LINK
Fall 2022: September
Midwestern Vascular Annual Meeting
September 15-17, 2022
JW Marriott and Devos Place
Grand Rapids, MI
