PSO Representative attending Meeting: Melissa Latus

Presentations: "Advancing Research with the SVS VQI Datasets: Research Charters", presented by Aline Hikari Ishida, University of Colorado Anschutz Medical Campus

General Discussion and Questions

    a. Should toe amputations planned and/or unplanned count against facilities in the infra module under return to OR?

    b. What counts as pre-op vein mapping? Melissa Latus clarified that it can be collected until incision/procedure start time. More education and documentation may be needed.

     c. LTFU completion percentage was suggested to be weighted by module and number of procedures rather than a computed %.

     d. Follow up with RMVS meeting to add VQI portion—completed.

     e. QI charters being done in RMR—suggestion made to share within the group any charters that centers can participate in.

     f. Leave data points blank if unable to find or unable to collect rather than adding unknown to the drop down.

     g. Ask about unblinding medications within the report.

     h. Is there a way to pull raw data out of the VQI for facilities to use for QI projects and/or download info into their EMR?

Action Items (including QI projects): none

Nominations (AQC, VQC, RAC, Medical Director): none

Next Meeting: Thursday, July 11, 2024 2-4 pm in conjunction with the RMVS meeting in Coeur D'Alene, ID
