

CAN YOU AFFORD **NOT** TO PARTICIPATE IN THE VQI REGISTRY?

The Society for Vascular Surgery Vascular Quality Initiative clinical registry reached the [1 million mark](#) for procedural data—but what’s the value in participation for *your* organization?

Here is a **breakdown** of what to consider.

WEALTH OF DATA

Since its inception in 2003, “big data” from the initiative has dramatically improved patient care, prompting changes in clinical practice that have saved thousands of lives.

REGISTRIES

MEASURABLE IMPACT ON PATIENT CARE

Members of the SVS VQI gain real-time access to data that empowers them to analyze variability, benchmark performance, and identify actionable improvement to elevate patient care.

From local vascular centers to nationwide health systems, here are just a few of the ways participants have relied on the registry to transform their patient care practices:

DECREASED LENGTH OF STAY (AND ASSOCIATED RESOURCES)

2 DAY (\$5,700+) REDUCTION IN PATIENT STAYS

Nebraska Medicine standardized care for lower extremity bypass patients to align their average LOS with regional and national figures

STRENGTHENED LONG-TERM FOLLOW-UP

61% ► 97% BOOST IN LONG-TERM FOLLOW-UP RATE

Yale New Haven Hospital drove up their long-term follow-up rate with a comprehensive program that included utilization of VQI case lists

OPTIMIZED PATIENT CARE AND SAFETY

4% ► 1.4% DECREASE IN SURGICAL SITE INFECTION

Catholic Health System closed a gap in patient communication to decrease surgical site infection over a one-year period

MORE EFFECTIVE CARE INTERVENTIONS

19.14% ► 57% INCREASE IN IVC FILTER REMOVAL RATE

WVU Medicine reduced the number of patients lost to follow-up, increasing IVC filter retrievals and attempts

GREATER POST-OPERATIVE MEDICATION ADHERENCE

26% RISE IN THERAPY UPON DISCHARGE

UC Davis utilized QI reports to dramatically increase their anti-platelet and statin discharge rate (to 97%) within a year
